

The logo for VICINITY 2020 features the word "VICINITY" in a grey, sans-serif font. The letter "I" is replaced by a stylized graphic consisting of a yellow semi-circle at the bottom and a blue semi-circle at the top, with a small yellow dot in the center. Below "VICINITY" is the year "2020" in a smaller, grey font. To the right of the logo is a network diagram with grey nodes and connecting lines.

Let's get started
First, you just need to create or choose a Team/Startup Profile

Select Team

Questions

Questions
Auto-Save Functionality
The below application form supports "auto-save" which Works as follows: once you open and edit the form, your changes are automatically saved. You can close the form and come back at any given moment (using the same F6S credentials) to continue editing your inputs. You can make as many changes you want up to the point where you submit your application. No changes are possible after the form submission.

1 Proposal title *

FUNDS	OFFERS	FUNDS
€60K	1	4 startups
per team	Mentors	per year

- Questionnaire
- Basic Info
- Overview
- Section 1. Benefit and Impact of the proposed Service for VICINITY
- Section 2. Business Model
- Section 3. Excellence and Soundness. Originality of the proposal
- Section 4. Capability of the proposer
- Miscellaneous

Watch out

5 Organization's Legal name *

250

16 Upload a pdf with the letter/s of support if you wish to support your proposal with evidence of proof of interest from external stakeholders. (Max file size: 30MB.) *

Attach 'letters of support' from relevant stakeholders, as evidence that your proposal is obtaining interest

1 Proposal Title: *

Please provide a simple and brief title for your proposal.

200

2 Please, indicate in which topic you are going to participate *

- Topic A: Value Added Service for the VICINITY pilots
- Topic B: Micro-Services for the VICINITY Platform

3 Abstract *

You must choose between Topic A or Topic B

10 Please, Indicate what is the main requirement covered by your proposal *

Please, select requirements accordingly with the topic selected above, If you selected "Topic A", only "Topic A" requirements will be taken into account in the evaluation.

- (A.1) Solutions for the integration of smart parking with other transport related sectors.
 - (A.2) Smart integration of Electric Vehicle charging stations into smart parking solutions, including consideration of current status and technical information.
 - (A.3) Smart transaction and rental models for vehicles and parking space that consider access, need, ownership.
 - (A.4) Smart booking systems, e.g. integrating Outlook or other personal information managers.
 - (A.5) Capturing the subjective experience of a room's indoor climate and/or "cleanliness" status, on a specific time to plan climatization and cleaning.
 - (A.6) Using the occupation information of a room to plan climatization and cleaning.
 - (A.7) Integration BIM models with dynamic data from sensors; dynamic audit.
 - (A.8) Analysis of real-time data from e.g. fitness trackers or beacons in sports centers.
 - (A.9) Monitoring of medical treatment plans based on IoT equipment, e.g. drug dispenser, dash buttons.
 - (A.10) Detection of social difficulties of the elderly via IoT devices and psychological profiles.
 - (A.11) Consideration of prediction of renewable energy production, e.g. with solar irradiance measurements in above services.
 - (A.12) Consideration of price signals from the energy market in above services.
 - (A.13) Analysis of energy savings, and of its impact, maybe in context with other data.
-
- (B.1) Frameworks that provide incentive mechanisms or micro-payments, using e.g. smart contracts.
 - (B.2) Frameworks that make the development of interactive applications on top of the VICINITY platform more efficient and easy, e.g. by software components that help to analyze, visualize data provided by VICINITY, or to interact with users.
 - (B.3) Provision of information from personal information managers such as Outlook to other services.
 - (B.4) Integration and co-creation with social network platforms such as MyData or DIGIME.

You must select one requirement

Question 27. Workpackages, work plan and deliverables list

The deliverables should content at least the following information:

- i. Intermediate and final technical and management reports(1)
- ii. Test plan and test implementation
- iii. Data management plan
- iv. Final technical and management information
- v. Evaluation Plan
- vi. Exploitation and business model

(1)Intermediate and final technical report shall include architectural design of the solution including security & privacy decisions and non-functional design (such as: performance, maintenance and installability), as well as, information about the dissemination and exploitation activities planned and undertaken
